Checking-in Introduction

Once a Solo session has been started, Checking-in allows you to indicate to your Organisation that you're safe and well via a single tap.

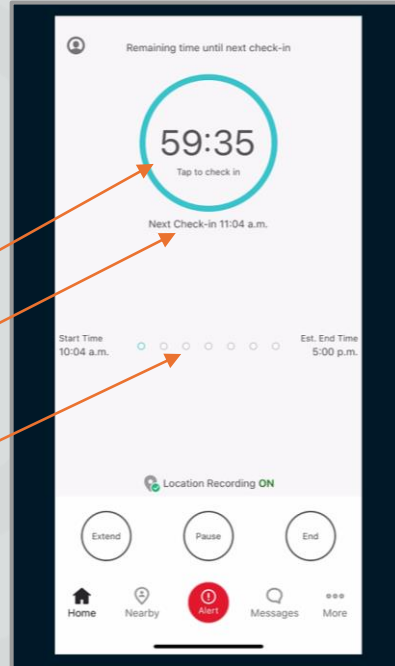

Checking-in

Active Session Screen

Depending on the profile selected when beginning the session, you may be required to check-in at set intervals.

If this is the case, after beginning a session, the following will be displayed:

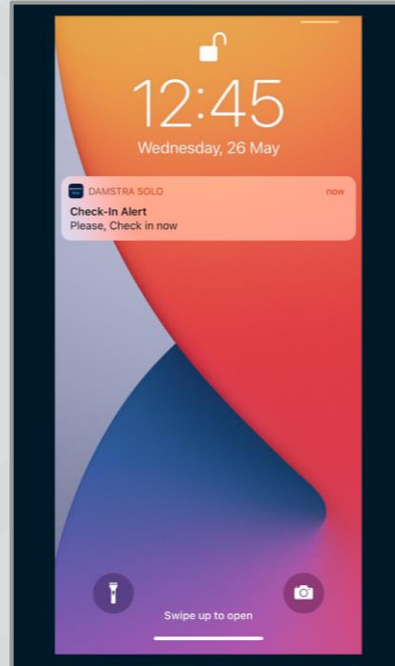

- a countdown timer indicating the amount of time remaining until the next check-in time
- the time of the next required check-in
- the number of check-ins expected during the session, represented by small dots across the screen

Checking-in

Check-in Reminder

Once the first check-in time is reached, you will be prompted to check-in via a push notification to your device.

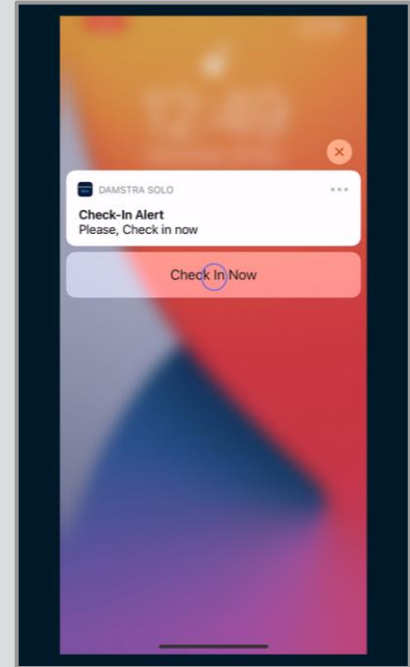

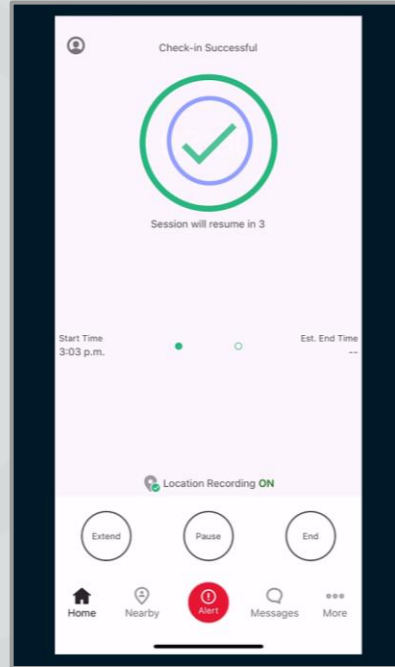

Checking-in

Check-in Reminder

To check in, simply **tap** the countdown timer if the app is open, or **select** *Check In* via the push notification received on your device.

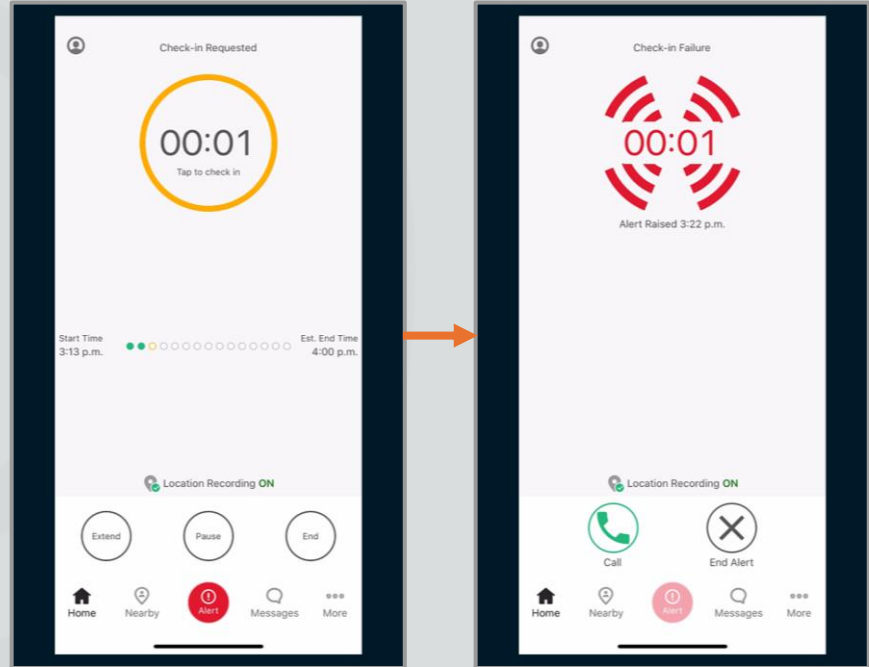

The check-in timer will now reset, a green check-in indicator will be displayed, and the Countdown timer will commence its countdown to the next preset check-in.

Checking-in

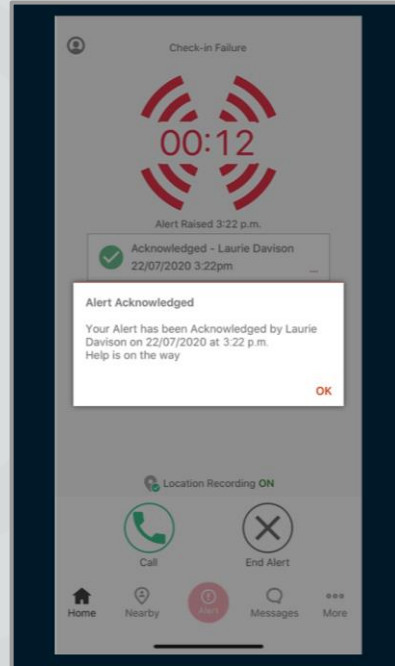

Missing a Check-in

If you do not check-in within a grace period determined by your Organisation, a Missed Check-in alert will be automatically raised, and your Organisation will be prompted to investigate as this may indicate that your safety has been compromised.

Checking-in Acknowledgement

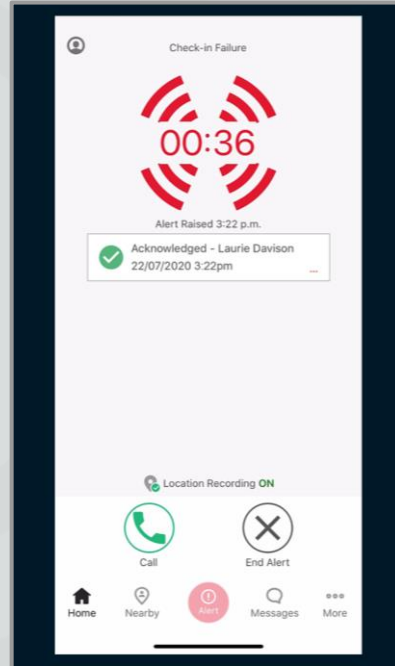

You may receive an acknowledgement from your Organisation to indicate that your Alert has been seen and is being attended to.

Checking-in Alert Screen

If the app is open, you will see:

- A timer, which shows the time that has passed since the check-in grace period was exceeded
- A 'Call' button, which will place a phone call to a predefined number via your device's phone app
- An 'End Alert' function which will cancel the Alert

Checking-in

Elective Check-ins

Tap the *End* icon to cancel the alert and begin the countdown to the next required Check-in once the situation has been resolved.

The End Alert confirmation will display.
Tap *End Alert* once more to confirm.
